RE: Lower Darby Creek Area Superfund Site (the "Site")

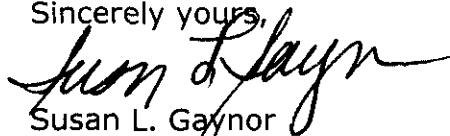

Dear Ms. Prisk:

This letter will confirm our telephone conversation this morning. I am in receipt of the materials you faxed me this afternoon.

Kimberly-Clark Corporation appreciates your contacting us regarding Kimberly-Clark's August 1, 2001 response to EPA's 104(e) request concerning the Site. In our conversation you stated that EPA understands that Kimberly-Clark could only assume that the nexus between itself and this Site is based on Scott Paper Company's involvement in the Marvin Jonas Superfund Site because EPA did not provide Kimberly-Clark with the materials you faxed me today (an interview summary of a former Eastern Industrial driver conducted earlier this year).

Kimberly-Clark will conduct further investigations in light of this interview summary and supplement its 104(e) response. Should you have any questions or need any additional information, please do not hesitate to contact me.

Sincerely yours,

Susan L. Gaynor
